

Widget Admin Access

If you do not want to change your Webinterface username, password and/or SecurePIN, just leave the fields empty:

New username: The username can be 3 to 20 characters long. Allowed characters: A-Z a-z 0-9 _ -

New password: Minimum length of 6 characters with at least one uppercase, one lowercase letter and one digit.

Retype password: Please enter the password again to prevent typing issues.

New SecurePIN: Allowed characters: A-Z a-z 0-9

Retype SecurePIN: Please enter the SecurePIN again to prevent typing issues.

You have to enter your current password and SecurePIN to authorize the requested changes.

Current password:

Current SecurePIN:

You can change the credentials of LoxBerry to access the webinterface and the shell. Leave fields empty, if you don't want to change the appropriate field. **Store your passwords! You may need to reinstall LoxBerry if you loose your credentials!**

New username changes the user for the webinterface. The shell access user always will stay 'loxberry'.

New password to change the webinterface and 'loxberry' shell password.

New SecurePIN changes the second factor key, that is requested for security-related actions on your LoxBerry. If an attacker could guess your password, the SecurePIN is a second wall against installing plugins and hijacking the root account.

For every change, you need to authenticate with your current password and SecurePIN.

The **root password**, shown after the setup wizard, cannot be changed anymore, and **is only shown once**.
