

Widget LoxBerry Services

Webserver

You can change the **Web port** of Apache from 80 to another free port, for example if the Homebridge plugin requires port 80. With the **Apache Log** button a live view of the Apache log is opened.

Watchdog

With the watchdog feature LoxBerry checks for important system health properties, and can automatically reboot, if thresholds exceeds.

More Options

Disable **SSDP/UPNP publishing** if other upnp devices experience problems scanning the network. You also can enable the **Serial Interface** and **Serial Console** on your Raspberry.
